JOSEPH GACHURU

SOFTWARE ENGINEER | BACKEND & FULL-STACK DEVELOPMENT | AI & DATA ENGINEERING

Nairobi, Kenya | GitHub: github.com/Jigishas | LinkedIn: linkedin.com/in/joseph-gachuru-375219350 | Portfolio: portfolio-site-phi-self.vercel.app

PROFESSIONAL SUMMARY

Software Engineering student and hands-on developer with practical experience building and supporting web applications, REST APIs, data-driven systems, and AI-enabled applications. Experienced across React, JavaScript/TypeScript, Python, Node.js/Express, PHP/Laravel, SQL, MongoDB, Docker, Git, cloud deployment, Nginx, and API integration. Strong interest in scalable backend systems, software architecture, cloud engineering, data engineering, and machine learning. Combines software development fundamentals with practical troubleshooting, performance optimization, database work, and production deployment.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, PHP, SQL, C/C++

Frontend Development: React, React 19, Vite, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui

Backend Development: Node.js, Express.js, Flask, Laravel, REST APIs, API Integration, Authentication

Databases: MySQL, PostgreSQL, MongoDB, SQL Server, Database Design, Query Optimization, Backup and Recovery, Performance Tuning

AI / Machine Learning: PyTorch, TensorFlow, Scikit-learn, OpenCV, EfficientNet, ResNet, NLP, Transformers, Computer Vision

Data Engineering / Analytics: Apache Spark, Apache Airflow, Kafka, Pandas, NumPy, Excel, Power BI, Tableau, ETL, Data Visualization

Cloud / DevOps: AWS, Azure, GCP, Docker, Kubernetes, GitHub Actions, CI/CD, Render, Vercel, Nginx, Cloudflare, Linux

Software Engineering: Data Structures, Algorithms, OOP, Agile, Testing, Debugging, System Design, Performance Optimization, Version Control

PROFESSIONAL EXPERIENCE

PLAT-DEL® | Software Engineering Intern / Industrial Attachment | Nairobi, Kenya | May 2026 – Aug 2026

- Developed and maintained web application features across frontend and backend systems using React, JavaScript, PHP/Laravel, REST APIs, SQL, and Git.
- Integrated frontend applications with backend APIs, troubleshooting authentication, CORS, cookies, API responses, and cross-origin request behavior.
- Supported production deployment and infrastructure troubleshooting using Nginx, Cloudflare, Linux, SSL/TLS, caching, static asset delivery, and server permissions.
- Improved frontend performance by reviewing polling patterns, caching opportunities, asset delivery, API calls, and PageSpeed performance findings.
- Worked with logistics-platform functionality involving user workflows, delivery operations, partner data, API integrations, and database-backed services.
- Applied software engineering practices including debugging, version control, environment configuration, testing, documentation, and production issue resolution.

SELECTED PROJECTS

HealthyCoffee – AI Coffee Leaf Disease & Deficiency Detection | React 19, Vite, PWA, Flask, PyTorch, EfficientNet, Docker, Render, Vercel

- Built an AI-powered web application for coffee leaf disease and nutrient-deficiency detection using image analysis.
- Implemented a React PWA with camera capture, image upload, responsive UI, offline-capable features, and backend health monitoring.
- Integrated a Flask inference API with optimized PyTorch models and production deployment across Render and Vercel.
- Implemented testing and deployment configuration, including Docker support and API integration for real-time model inference.

Personal Portfolio Platform | React 19, TypeScript, Vite, Tailwind CSS, shadcn/ui, Express.js, Nodemailer

- Built and deployed a responsive portfolio platform showcasing software engineering, backend, data engineering, and AI projects.
- Implemented reusable UI components, responsive layouts, animations, dark-mode support, contact functionality, and a Node/Express backend.
- Applied frontend performance practices and modern TypeScript/React development workflows.

Smart Farming Machine Learning Project | Python, PyTorch, ResNet, Machine Learning

- Developed an agricultural computer-vision training workflow using a ResNet-based model and a Kaggle dataset.
- Implemented model training, evaluation, prediction, and accuracy analysis workflows in Python.

Data Engineering & Analytics Projects | Python, SQL, Apache Airflow, Spark, Kafka, Pandas, NumPy, Power BI

- Built learning and project work around ETL workflows, orchestration, data processing, analytics, and visualization.
- Worked with Python, SQL, Airflow, Spark, Kafka, Pandas, NumPy, Excel, Power BI, and Tableau concepts for data-driven solutions.

EDUCATION

Kirinyaga University

Bachelor of Science (BSc) in Software Engineering | 2023 – Present

Relevant focus: Software Engineering, Data Structures and Algorithms, Databases, Web Development, Cloud Computing, Software Testing, Systems Engineering, Data Science

CERTIFICATIONS & PROFESSIONAL CREDENTIALS

Public credential profile available through Credly: credly.com/users/joseph-gachuru. Individual certificate titles are intentionally not listed here because the public credential page did not expose the certificate metadata in the accessible crawl; this avoids inventing credentials.
